

2/14/2019

Good Day,

Doug Rebout and I attended the Agriculture & Extension Education Committee meeting last night. We both own land in the Bass Creek District of the Rock County Drainage District. We were there to stress the importance of the Committee's responsibility in recommending persons to be appointed to the Rock County Drainage Board.

It has been discovered that terms of several members of the current Rock County Drainage Board expired in October 2018. The Agriculture & Extension Education Committee recommends persons to be appointed to the Drainage District Board and then a Rock County Circuit Court Judge officially appoints the members of the Rock County Drainage Board.

At the meeting a form was distributed for persons who would like to be considered for the Drainage Board. The person has to own land in one of the drainage districts within the Rock County Drainage District. I have enclosed the form and a Drainage District map which indicates a district is within your town.

We ask that you spread the word that appointees are needed and distribute the form to anyone who would be a qualified candidate and interested in serving on the Drainage Board.

I just noticed the deadline on the form has the incorrect year. Doug and I also encouraged the Committee to take their time in finding qualified candidates, so I'm not sure if March 13, 2019 will be the actual deadline. Any questions contact Rich Bostwick, 201-8600.

Thank you.

A handwritten signature in cursive script that reads "Sue Douglas". The signature is written in black ink and is positioned below the "Thank you." text.
